

The E-Muvr Utility Box is a great way to protect valuable tools or equipment. It allows operators the ability to haul extra gear while keeping it safe, secure, and protected from the elements.

Shown on the **Land Pride Treker®**

Utility Box features:

- 1/8" thick aluminum diamond plate construction
- Ball bearing drawer slides for long life and smooth operation
- 80 lb. load rating on each drawer
- Locking latch mechanism for security
- Able to stack on top of each other for added storage (using quick attach points)
- Sturdy interior framework allows our boxes to support other attachments
- Boxes are 50" long x 18" wide. Each drawer is 20" wide x 16" long x 4" deep.

Latch Operation

Push in at top of latch

Pull out bottom

Twist left or right 90 degrees

Pull out on drawer

Placing the tiedowns inside the box ensures security when the drawers are installed and locked

Toolbox can be installed or removed by one person.

Quick Attach tiedown shown installed in Utility Box

Knockout attachment opening Quick Attach Tiedown

Our quick attachment system achieves a tight connection by using a cam instead of bolts. This feature allows for easy installation and removal without any tools!
